

*FPGA's, MCU, Analog & Mixed Signal, Timing Solutions
offering pin -to-pin alternatives*

Technology-driven replacements

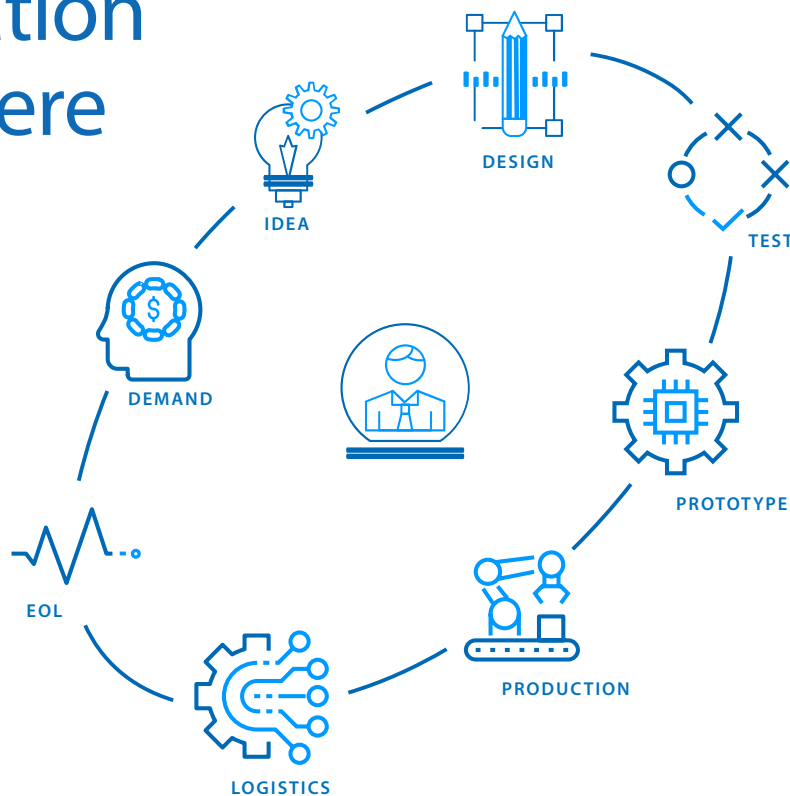

The Semiconductor market reaches a more normalized supply-demand balance and is getting back to more standard lead times with exception of certain semiconductors. The long-term-outlook for the semiconductor market remains strong due to the ever-increasing role of chips in powering the critical technologies of today and tomorrow. Our customers are all requiring a more sustainable supply chain that can be trusted in terms of supply, availability, pricing and quality. Alcom listened to the needs of customers for both purchasing, production and design-in requirements.

During the last Months Alcom electronics have concluded Regional Specialist Distribution agreements with IC design Houses and manufacturers in the area of :

- **Programmable Logic** whereby we offer **Gowin** alternatives to vendors such as Xilinx, Altera and Lattice
- **Microcontrollers** from **Geehy** offering innovative Cortex M4-M3-M0+ including automotive grade and P/P replacements to STM and other vendors
- **MCU, MPU's, Audio Converters** from **Nuvoton**
- **Capacitive Isolation Technology** from **Chip Analog** replacing vendors such as Skyworks, ADI and TI
- **Analog and Mixed Signal products** including CAN transceivers; RS232/485 interfaces; Power Management, Data Converters incl TI and ADI replacements
- **Timing solutions** offering High Stability Clocks, Chips, X-Tals, Oscillators, MEMS-timing, Real-time Clock modules

Co-creation starts here

Alcom considers everybody an indispensable added value in the collaborative chain with all of its partners.

Easy to use, high performance, low-cost FPGA solutions for consumer, industrial, automotive, and communications applications.

- Arora V SRAM Based FPGAs
- LittleBee Flash Based FPGAs
- Arora SRAM Based FPGAs
- GoBridge ASSP
- GOWIN® EDA

Low-Density / Low Power (LUTs < 10K): GW1N, GW1NR, GW1NS, GW1NRF
Mid-Density (10K < LUTs < 100K): GW2A, GW2AR, GW2ANR
High-Density (LUTs > 100K): GW5AT, GW4ST

32-bit APM32 Industrial & Automotive Grade MCU GW Series Wireless MCU

Top Fabless & Chip design IC manufacturer driving industry innovation

- APM series industry grade MCU's ARM Cortex -M0+, M3, M4
- APM 32 Series Automotive grade MCU's: M0+, M3, M4
- GW Series wireless MCU: GW8811-BLE4.2/GW3323-BLE5.2

High performance analog, mixed signal power management

- >1600 products, 9 R&D centers
- Many new analog product announcements within the next 2 years
- Fast growing company, short lead times & competitive prices
- Qualified ecosystems with wafer foundry, assembly, test subcontractor, ...

To build the analog world on chips

- Providing industrial & automotive IC's
- Isolation : Driver & Power
- Interface : High performance analog

Global technology leader in the field of frequency, clock, timing & RF solutions

- High stability clocks
- Full chain clock chips
- RF components

APM32 MCU

Security SOC

BLE 5.1 SOC

APM32A Automotive Grade MCUs

Industrial grade
Low-power consumption
High performance

APM32 MCUs can contribute to reducing product development time and cost, while at the same time optimizing product performance.

Multicore heterogeneous
secure encrypted
architecture

Strong physical unclonability and anti-attack ability guarantee data security.

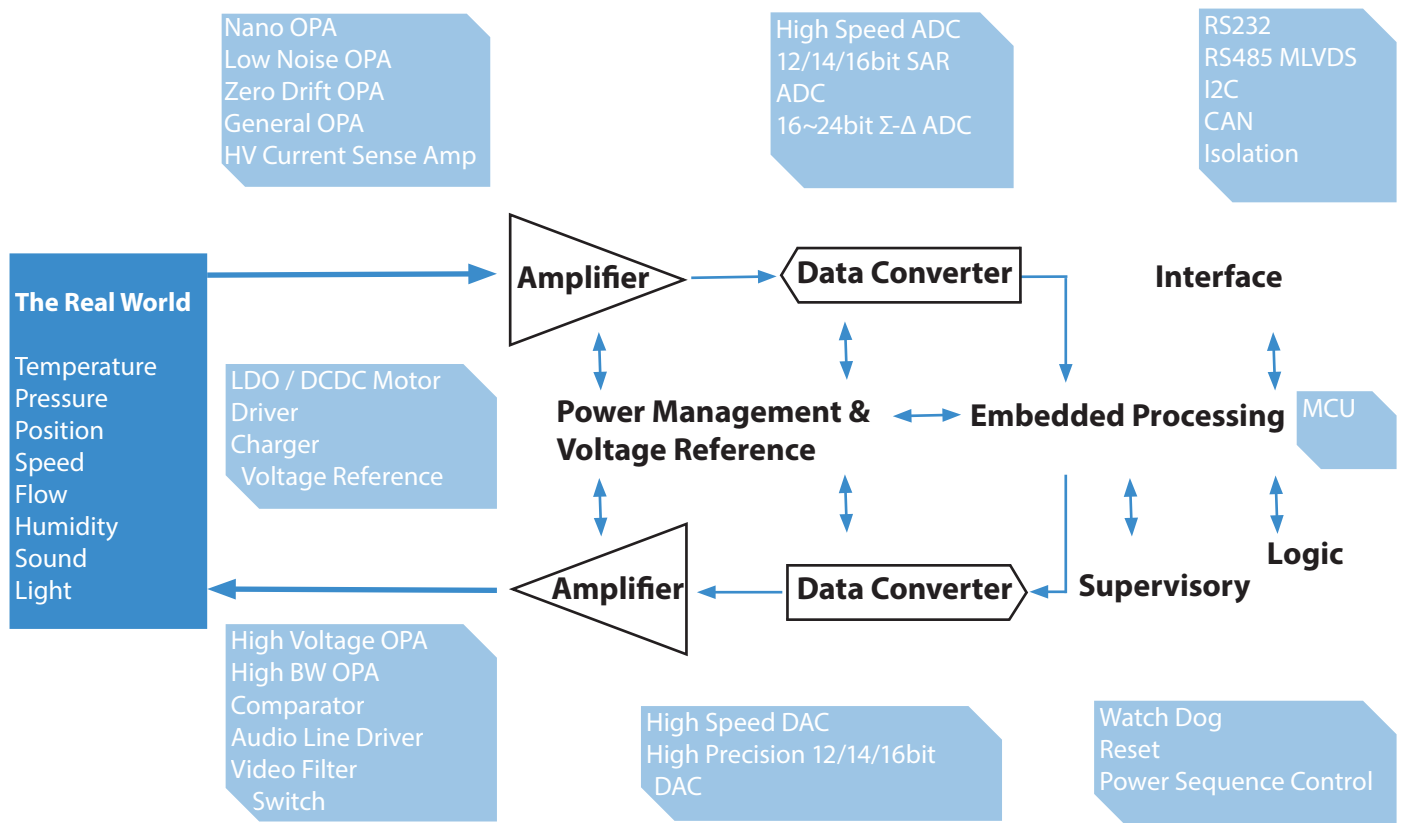

Ultra-low power
High sensitivity
High security

Intelligent interaction among data devices provides a better user experience.

The full series obtains AEC-Q100 certification and meets automotive-grade reliability standards
Based on Arm® Cortex®-M0+/M3/M4 cores
Operating temperature range: -40°C~125°C

New product releases

FLASH & S-RAM BASED FPGA SERIES

World's fastest growing FPGA Company

Low-Density / Low Power (LUTs < 10K): GW1N, GW1NR, GW1NS, GW1NR

Mid-Density (10K < LUTs < 100K): GW2A, GW2AR, GW2AN

High-Density (LUTs > 100K): GW5AT, GW4ST

FPGA FOR XILINX & ALTERA'S ARTIX 7, SPARTAN 6 & CYCLONE IV

Arora-V 22nm High-Performance FPGA family Arora-V high performance FPGA family utilizing advanced 22nm SRAM technology and integrating 270Mbps/12.5Gbps high speed SerDes interfaces, PCIe 2.1 hard core with support for PCIe x1, x2, x8 modes, along with MIPI hard core single lane module at up to 2.5Gbps, and DDR3 interfacing at speeds up to 1333 Mbps.

32-BIT ARM® CORTEX -M0+,M3, M4 MCU

Based on Arm® Cortex®-M4F core, the APM32F405/407 series supports single-precision FPU, enhanced DSP, and high-speed OTG with on-chip PHY. Its large memory meets the needs of complex programs and extensive resource peripherals to fully enhance the product's diverse control and extensive connectivity.

ANALOG, SIGNAL, POWER, MIXED SIGNAL CIRCUITS

Analog and Mixed Signal products including CAN transceivers; RS232/485 interfaces; Power Management, Data Converters incl TI and ADI replacements Established in 2012, 3PEAK is one of the fastest growing semiconductor companies having 1600 different products, 9 R&D centers and >3700 current customers worldwide.

CHIP ANALOG'S ISOLATOR PRODUCTS

Our broad portfolio of isolation products use Chipanalog's capacitive isolation technology based on silicon oxide (SiO2) insulation barrier that provide complete galvanic isolation between two power domains. We offer standard digital isolators, low-power digital isolators, dedicated digital isolators for smart meter and the complete digital isolators with integrated power supply

HIGH STABILITY CLOCKS, CHIPS AND RF PASSIVE DEVICES

High stability clock series: Crystal 32.768KHz, Crystal MHz, SPXO, TCXO, OCXO, Clock Module, Timing Server
Chip Server: Real Time Clock (RTC), Clock Buffer, Phase locked loop (PLL), IEEE1588v2, All-Silicon Oscillator, Ethernet PHY
RF Passive Devices - Circulator / Isolator: SMD Circulator / Isolator, Drop-In Circulator / Isolator, SMT Circulator / Isolator

Get to know us

ALCOM PROVIDES THE WORLD'S MOST ADVANCED TECHNOLOGIES.

With a team of like-minded entrepreneurs, Alcom will continue to inspire its valued customers to use advanced innovative building blocks in vertical markets. The importance of providing high-level services and a human interface based on specialism, knowledge and design-in expertise will remain key differentiators.

Alcom is positioned for growth. We invite all our customers to discuss their current and future concepts and designs. Let's connect, work and grow together.
